

EuroGOOS Working Groups

Sylvie Pouliquen

Ifremer

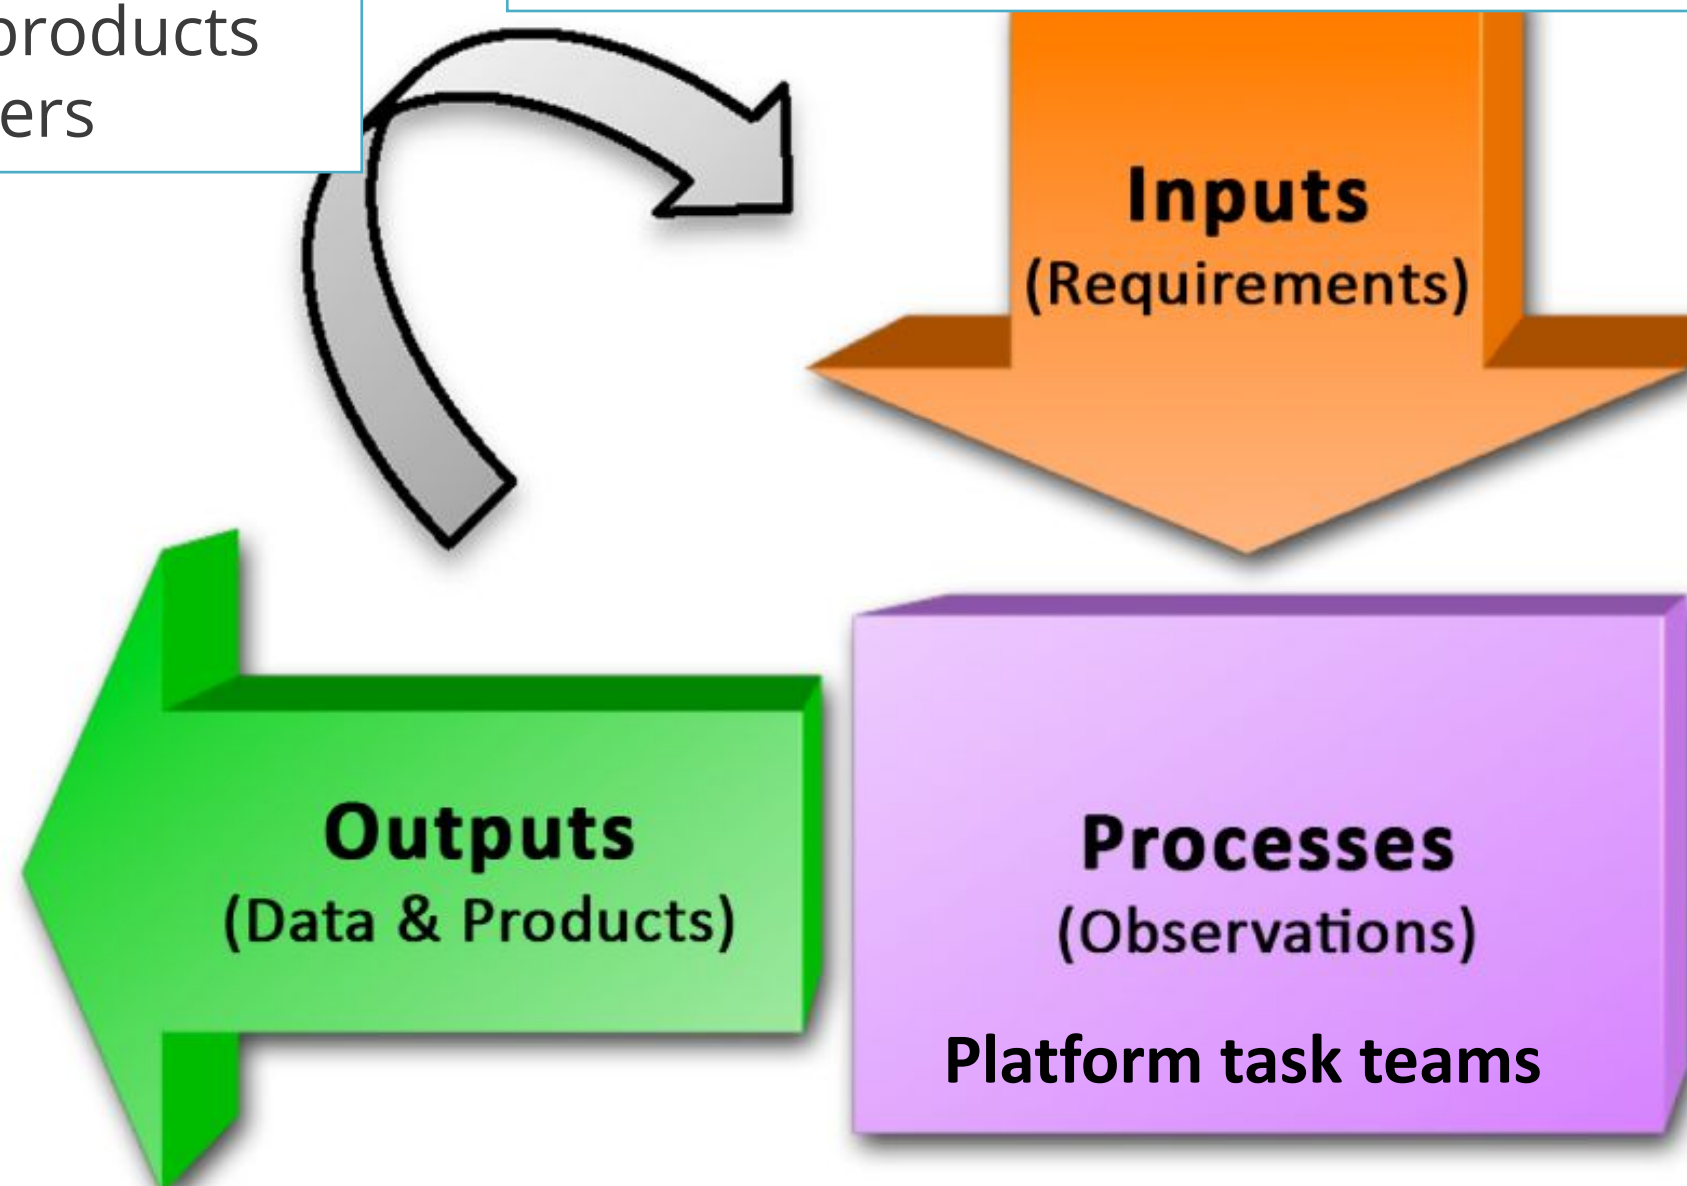

EuroGOOS Working Groups : coordinating joined actions at different levels of the value chain

Coastal WG: examine the entire value chain from coastal in situ observations, satellite data, ocean forecasts and analysis, to products and services for coastal users

Science Advisory WG : deliver policy advise on EuroGOOS research priorities: Sustained European ocean observing, Modelling and forecasting techniques, Coastal operational oceanography and Operational Ecology

DATAMEQ WG: fosters links between real-time and historical data streams and works closely with EuroGOOS Task Teams for FAIR data service implementation

Technology WG : Optimize collaboration and integration on technology and technical issues
